DETAILED ACTION

Claims 16, 17 and 61 were amended in Paper No. 19, 10/9/2002. Claims 16-17, 19-21, 60-84 are pending and under consideration.

Response to Amendment

The rejection of claims 16-17, 61, 65-68, 77-78 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention has been obviated by Applicant's amendment, and is thus withdrawn.

The rejection of claims 16-17, 61, 65-68, 77-78 under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a polypeptide comprising an amino acid sequence set forth in SEQ ID NO: 2, does not reasonably provide enablement for a protein encoded by a nucleic acid which hybridizes to SEQ ID NO: 1 has been obviated by Applicant's amendment, and is thus withdrawn.

Claim Rejections - 35 USC § 112 second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-17, 61-84 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 16, 61, 63-64 recite the limitation "cellular signaling and/or a cellular response". This limitation is vague and indefinite. The term "cellular response" is exemplified in the specification as "chemotaxis" on page 13, lines 5-6. However, the specification also discloses that human IP-10 and human Mig have numerous effects on lymphocytes, thus the metes and bounds of the limitation "cellular signaling and/or a cellular response" cannot be determined. This rejection could be overcome by including the cellular cellular response function in the claim, such as "chemotaxis". Claims 62, 65-84 are rejected insofar as they depend on the recitation of the term "cellular signaling and/or a cellular response".

Conclusion

Claims 16-17, 61-84 are rejected.

Claims 19-21, 60 are allowable.
